MAYANK VEKARIYA

Project Management | Renewable Energy & Infrastructure
Mayankvekariya100@gmail.com | +49 176 85932598 | Nürnberg, Germany
germanymayank.github.io/mayank-portfolio

PROFILE

Electrical engineer and project manager with 4+ years delivering end-to-end engineering projects in renewable energy and industrial manufacturing. Managed solar PV and motor-engineering programmes worth up to approx. EUR 500K, with direct responsibility for scheduling, risk identification, technical documentation, and quality assurance across cross-functional teams of up to 10. Experienced in coordinating engineering, procurement, operations, and field teams as a single point of interface. Currently supporting strategic marketing and competitive intelligence in a high-precision technology environment, combining analytical thinking with structured reporting for executive stakeholders.

PROFESSIONAL EXPERIENCE

Working Student, Strategic Marketing (Motion & Sensing)

attocube systems GmbH | Nurnberg, Germany Dec 2024 - Present

- Delivered 4 structured competitive-landscape analyses for nanopositioner and precision-sensor product lines, informing pricing decisions and a new product-bundle strategy
- Designed and built the company's first Distributor Knowledge Database in SharePoint, centralising product, pricing, and application data for 15+ global partners and reducing onboarding queries by approx. 30%
- Gathered and documented customer and application requirements across 3 market segments, feeding directly into the 2025 product roadmap approved by the executive team
- Produced 6 decision-making documents and strategy decks for quarterly C-suite portfolio reviews, translating technical and market data into clear recommendations

Research Assistant

Hochschule Harz | Wernigerode, Germany May 2023 - Sep 2024

- Collected, cleaned, and analysed datasets of 5,000+ records for applied innovation-management research, co-authoring 2 published papers
- Prepared analytical reports and technical documentation for 3 internal presentations and 1 conference submission
- Standardised the group's data documentation process, cutting new-assistant onboarding time from approx. 2 weeks to 3 days

Project Manager

Falcon Pumps Pvt. Ltd. | India Jan 2021 - Dec 2021

- Led end-to-end delivery of 6 solar PV and motor-engineering projects (feasibility through commissioning), all completed on schedule and within 5% of budget across a combined approx. EUR 500K portfolio
- Produced and maintained all project-relevant technical documentation throughout the project lifecycle, including site assessment reports, commissioning records, and regulatory compliance files
- Owned scheduling, risk identification, and quality assurance for each project, identifying and resolving 15+ supply-chain risks during global component shortages while limiting delays to under 1 week
- Coordinated internal and external interfaces across engineering, production, procurement, field teams, clients, and suppliers, acting as the single point of contact throughout execution
- Negotiated vendor contracts for panels, inverters, motors, and electrical components, reducing procurement costs by 12%; maintained zero safety incidents and rework rates below 3% across all sites
- Applied automation technology principles in motor-control and pump system configurations, ensuring installations met applicable protection and control standards

Junior Project Manager / Trainee

Falcon Pumps Pvt. Ltd. | India Jun 2019 - Dec 2020

- Developed project-tracking dashboards (Gantt charts, cost trackers, risk logs) used across 4 departments, replacing ad-hoc spreadsheets and improving reporting consistency and independence of teams
- Monitored budgets and change orders for 3 concurrent projects, flagging deviations early to keep all within approved limits
- Rotated through production, quality, and engineering over 6 months, building hands-on understanding of electrotechnical manufacturing and quality control processes

EDUCATION

M.Sc. Technology & Innovation Management

Hochschule Harz | Wernigerode, Germany 2023 - 2026

- Focus: Strategic Management, Product Lifecycle Management, Digital Business Models, Agile Methods, Big Data

B.E. Electrical Engineering

University of Pune | India 2016 - 2019

- Focus: Automation Technology, Industrial Engineering, Microprocessors, Renewable Energy Systems, Control Systems

PROJECTS

- Portfolio: germanymayank.github.io/mayank-portfolio
- Solar PV Site Coordination: Developed a standardised site assessment and commissioning framework used across 6 renewable energy projects, covering protection and control verification, earthing checks, and grid-connection sign-off
- Distributor Knowledge Database (attocube systems GmbH): Designed and deployed a SharePoint-based knowledge platform for 15+ international partners, consolidating product specs, pricing data, and application documentation into a single structured system

SKILLS

- **Project Management:** End-to-end delivery, scheduling, risk identification, budget control, quality assurance, change management, technical documentation
- **Engineering:** Electrical engineering, renewable energy systems, automation technology, control systems, protection and control, site assessment
- **Tools:** MS Project, Primavera P6, MS Office (Excel, PowerPoint, SharePoint), Power BI (basic), ERP systems, Jira
- **Soft Skills:** Structured and analytical work style, solution-oriented, cross-functional team orientation, stakeholder communication, independence in execution
- **Languages:** English (fluent), Hindi (fluent), German (A2, progressing to B1)
